

ABOUT ME

Web3 Ecosystem Contributor | Node Operator | Technical Support

Web3 enthusiast with **3+ years of active experience** in ecosystem growth. I specialize in infrastructure (nodes, VPS, GPU compute) and technical community engagement. I bridge the gap between complex protocols and end-users by creating guides, automating setups, and providing direct technical support.

- **Core Focus:** Infrastructure, Early-stage Testnets, Technical Content, and Community Support.
- **Tech Stack:** Linux/Ubuntu, CLI, Bash scripting, Solana Devnet (Prototyping).

WEB3 COMMUNITY & ECOSYSTEM EXPERIENCE

Nubit - Ambassador (1 year)

- Published technical guides and educational content on **X (Twitter) and Medium**.
- Provided regional community support and active participation in **AMA sessions**.
- Streamlined reporting and tracked ecosystem growth metrics

Cysic - Community Contributor (OG)

- **Technical Support:** Managed onboarding for users installing prover/verifier nodes.
- **Automation:** Wrote simple **setup scripts** to simplify the installation process for non-technical users.
- **Impact:** Awarded **OG role** for consistent help in resolving complex infrastructure issues.

Nerochain - Ambassador (4 month)

- Localized technical documentation and created user-friendly **guides**.
- Moderated local discussions and increased community engagement.

Arcium - Builder

- Developed **visual and technical content** explaining protocol mechanics.
- Translated/**localized AMA sessions** and supported local community events.

INFRASTRUCTURE & TECHNICAL SKILLS

Technical Stack

- **OS/Admin:** Linux / Ubuntu (Advanced), VPS Administration.
- **DevOps:** Node Deployment, Environment Setup, CLI Tools.
- **Automation:** Basic Bash scripting for installation optimization.
- **Documentation:** Technical writing, Guides, Community Tutorials.

Web3 Development

- **PriVo:** A private voting dApp on Solana Devnet.
- **Stack:** Web UI, Arcium integration, VPS deployment, Domain management.
